Contact Info

Who from your team should be contacted about this form? *

CHUN-YU CHEN (@a1ex0) Assign to me

Check In Description

What kind of Check In are you submitting? *
To know more about what kind of activities need check-in, please refer to the "Activity" section on our White List ↗ policy

- (●) Activity
- ( ) Whole Organism or Cell Line
- ( ) Part

How does this organism, part, or activity fit into your project goals? *
In 1-3 sentences, please briefly describe how this organism, part, or activity fits into your overall project plan.

Why are you checking in this organism, part, or activity? *
Choose the main reason you are submitting this form.

- ( ) We saw that it's not on the White List ↗
- ( ) We saw it's required by one of the safety policies ↗
- ( ) We wanted extra guidance on biosafety and/or biosecurity
- ( ) We were told to submit a Check In by the iGEM safety team
- ( ) We were told to submit a Check In by one of our supervisors
- ( ) Other (please comment)

Activity Description

What kind of activity are you checking in? *
These categories are based on the White List ↗ guidance on activities. Choose the main reason you are checking in this acti

- ( ) Bringing a product of a genetically modified organism outside the lab (policy ↗)
- ( ) Conducting laboratory experiments using human samples, such as blood, DNA, other bodily specimen
- ( ) Increasing risks from antimicrobial resistance (policy ↗)
- ( ) Biasing the inheritance frequency of a genetic marker in an organism's progeny, e.g. creating a gene d
- ( ) Creating a novel hazardous biological agent
- ( ) Making a hazardous biological agent more hazardous or more suitable for use as a weapon
- ( ) Enabling a hazardous biological agent to evade common diagnostic or detection tools
- ( ) Rendering a vaccine ineffective
- ( ) Other activity

Please give a step-by-step description of the planned activity, such a detailed experimental protocol. *

Identifying and managing risks

What risks have you identified from this organism, part, or activity? *

Please discuss both the hazards you have identified and how they might be realized. For example, is the risk due to the pote to relevant supporting information, such as culture collection data sheets.

What measures have you put in place to manage the risks you have identified? *

Please provide detail on how you are managing the risks identified in the question above.

Are there alternative ways to achieve your project goals that would present less risk? *

Please discuss your rationale for needing to work with this organism, part, or activity. If you do not believe it poses elevated

Is there anything else you want to tell us?

You can use this space to provide more details about risks from your project and how you are managing them. We also welc this form, or your feedback on the form itself.
